

Choose the screens that show the livestream

Enable screens paired with the community and check the settings for switching between carousel and livestream.

5 min · Available · 2026-09-22

Before you begin

- ✓ You have Manage livestreams access.
- ✓ Configure the place of worship's channel and pair at least one screen.

1

STEP 1 OF 4 · 1 MIN

Open screen connections

From Screens → Live use Connect to the livestream under Shortcuts. This page selects MiaChiesa screens; it does not connect social destinations or restreaming services.

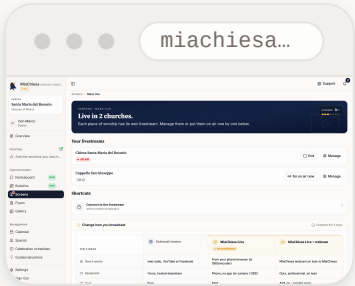

Fig. 1 The shortcut opens the screen controls.

2

STEP 2 OF 4 · 1 MIN

Check the channel and screens

Choose the place of worship at the top and check Channel configured. The screens panel lists the community's displays; each display follows the channel of its assigned place.

The place selector changes channel settings. It does not automatically move screens between places.

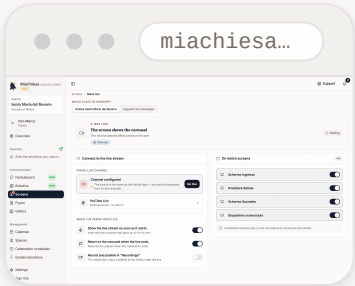

Fig. 2 The list shows available destinations and the enabled-screen count.

3

STEP 3 OF 4 · 2 MIN

Enable only the intended destinations

Use the switch on each row. Changes save immediately; there is no final Save button. Disabled screens remain on the carousel during the livestream.

Check the switch and count, then test the destination on the physical device while broadcasting.

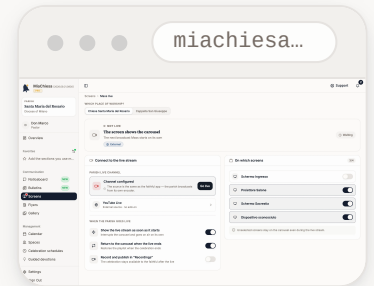

Fig. 3 Schermo Ingresso has been disabled in the demo; the other three remain selected.

4

STEP 4 OF 4 · 1 MIN

Review carousel switching

Show the livestream when it starts and Return to the carousel when it ends apply to the selected channel and save immediately. Verify the behaviour on a real display.

The recording control does not provide recordings of an external source; use the broadcasting service for those.

What you have achieved

✓ You checked the channel and enabled destinations.

✓ You verified behaviour on the destination screen.

Troubleshooting

No screens appear

Pair a device from Screens and check the active community before returning to livestream connections.
