

Show choir songs to believers

Decide whether the songbook, setlists and chords appear in the members' app and on the public page, and share the QR for the pews.

3 min · Available · 2026-09-26

Before you begin

- ✓ You need Configure choir module.
- ✓ The Visibility to members tab is in the community's settings, not in a single choir group's.

1

STEP 1 OF 4 · 30 S

Open Visibility to members

From **Choir** open **Setlists**, then **Setlist settings** and the **Visibility to members** tab. **Songbook visible to members** is the main switch: the songbook entries appear in the members' app and on the public page, always and only with approved catalog lyrics.

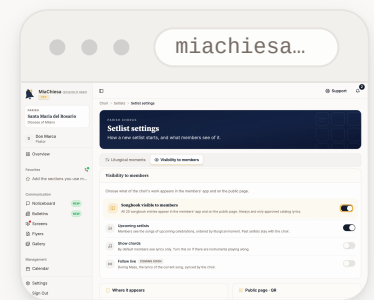

Fig. 1 The songbook is the main switch.

2

STEP 2 OF 4 · 1 MIN

Choose what they see

Upcoming setlists shows the songs of upcoming celebrations, ordered by liturgical moment. **Show chords** adds chords to the lyrics, useful when instruments play in church. Each switch saves at once: **Setting saved** appears.

Everything off

While songbook and setlists both stay off, "The songs are not visible yet" appears and the public page stays empty.

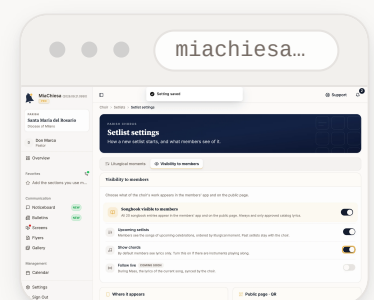

Fig. 2 Changes apply to members right away.

3 STEP 3 OF 4 · 1 MIN

Share the public page

Where it appears tells you whether the app, the Liturgy page and the public page are **Active** or **Off**; **Believer view** opens the preview. In **Public page · QR** use **Copy link** or **A5 poster for the pews**: whoever scans the QR sees today's songs without signing up.

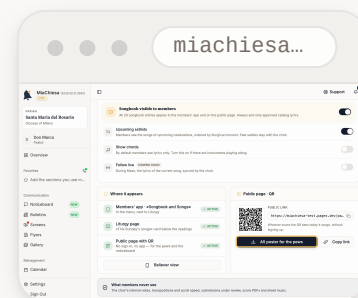

Fig. 3 The poster carries the public page's QR.

4 STEP 4 OF 4 · 30 S

Hide or show one setlist

On a setlist's page, the **Visibility to members** box has the **Visible to members** switch. A setlist reaches members only when both this switch and **Upcoming setlists** are on.

What members never see

The choir's internal notes, transpositions and scroll speed, submissions under review, score PDFs and sheet music.

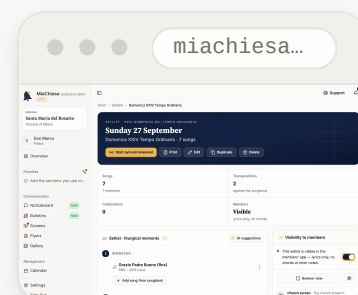

Fig. 4 Here you make an exception for a single setlist.

What you have achieved

- ✓ Members see the songs you chose in the app and on the public page.
- ✓ The QR for the pews leads to today's songs.

Troubleshooting

I can't see the Visibility to members tab

You are in a choir group's settings: visibility is a community setting. Open the community's Choir.

I see “The community has not opened setlists to members yet: while that is off, nothing is published.”

Turn on Upcoming setlists in Setlist settings, Visibility to members tab.

Copy link and the poster are disabled

Turn on at least Songbook visible to members or Upcoming setlists.

I can't see Setlist settings

You need Configure choir module.
