

Show a slide only on certain days and times

Limit a playlist slide to a period, to certain weekdays, to a time window or to a liturgical season.

3 min · Available · 2026-09-26

Before you begin

- ✓ You need the Manage screens permission.
- ✓ The slide must belong to a saved playlist.

1 STEP 1 OF 4 · 30 S

Open the slide's scheduling

Open **Screens**, go into the playlist and select the slide. Scroll to the **Scheduling** card: leave it empty and the slide is always shown.

At the top right of the card the label tells you whether, with the current choices, the slide is **Active now** or **Not active now**.

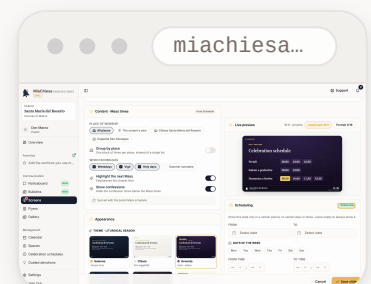

Fig. 1 With no limits the slide is always active.

2 STEP 2 OF 4 · 1 MIN

Choose days and times

Under **Days of the week** select the days the slide should appear, for example **Sun** for the Sunday Mass times. **From time** and **To time** limit the time window.

The label updates immediately: if today is not among the chosen days it becomes **Not active now**.

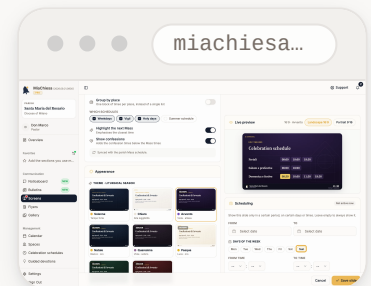

Fig. 2 The label shows the effect of your choice straight away.

3

STEP 3 OF 4 · 1 MIN

Limit the period

With **From** and **To** choose the start and end dates. Under **Only during** you can tie the slide to a liturgical season: the dates fill in by themselves. **Always** removes the link.

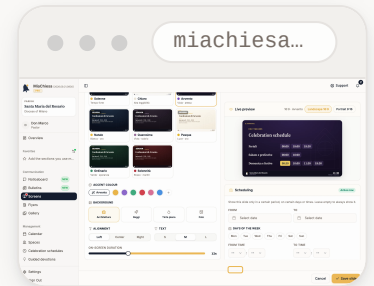

Fig. 3 A liturgical season sets From and To for you.

4

STEP 4 OF 4 · 30 S

Save

Select **Save slide**: "Slide saved" appears and you go back to the playlist. Screens using the playlist show the slide only at the chosen times; the rest of the time they move on to the next one.

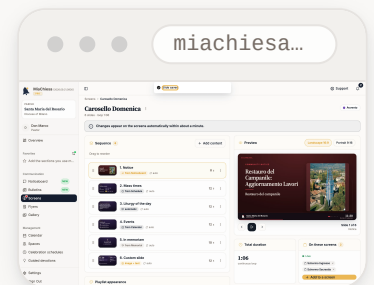

Fig. 4 The schedule applies on every screen using the playlist.

What you have achieved

✓ The slide appears only on the chosen days, times or period.

✓ Outside those times the screens show the playlist's other slides.

Troubleshooting

The slide never appears

Check the label in the Scheduling card: if it says Not active now, the days, times or dates exclude the current moment.

I want it shown all the time again

Deselect the days, clear times and dates and choose Always under Only during, then save.

I see "Slide operation failed"

The slide was not saved. Check your connection and select Save slide again.
