

Share the installation link

Prepare the community's installation link and display its QR without confusing it with the public profile.

4 min · Available · 2026-09-22

Before you begin

- ✓ You have Create flyers access for the QR controls.
- ✓ Select the community you want people to follow.

1 STEP 1 OF 4 · 1 MIN

Open Spread the app

Select the correct community and open Spread the app. In Bulk Operations, also check the active member: each community has its own link. In Merged mode, the link identifies the pastoral unit.

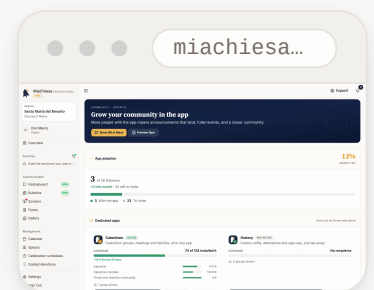

Fig. 1 Check the context before copying the link or showing the QR.

2 STEP 2 OF 4 · 1 MIN

Choose the installation link

Under Share the invite, keep Install the app selected. The field, message and QR follow the selected destination; Public page leads to the public profile instead.

Use Copy to obtain the link or choose a sharing service. Check the recipient and message in that service before sending.

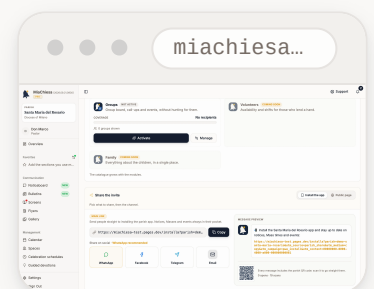

Fig. 2 The link is ready to copy; this screen does not demonstrate sending it.

3

STEP 3 OF 4 · 1 MIN

Show the QR in person

Show QR at Mass opens a large code for installing the active community's app. Check the name above it and keep it visible while people scan it.

Download PNG saves the code as an image. Check that the file has been saved and the code is readable before printing or projecting it.

Fig. 3 The QR is open in the demo; it has not been downloaded or sent.

4

STEP 4 OF 4 · 1 MIN

Check the phone's installation path

Opening the link takes the person to the installation page with the community context. Instructions depend on the device and browser. Sharing or opening the link does not install the app automatically.

If the destination is wrong, return to Spread the app, correct the context and obtain the link again.

What you have achieved

- ✓ You identified the correct community's installation link.
- ✓ You checked the QR and the recipient's installation path.

Troubleshooting

I cannot see the QR command

The QR and flyer controls require Create flyers access. A person with only notice management access may see the sharing page without those controls.
